

Regenerative Aesthetics Insights

Thank you for subscribing to our Regenerative Aesthetics Insights newsletter! This newsletter is designed to keep you at the tip of the spear on the latest news and trends across the aesthetics market. As a leading manufacturer of Exosomes, we want our support and customer engagement to match the unquestionable quality and performance of our products.

What's New at Exocel Bio

Exocel Bio is Growing Worldwide

Demand for exosomes is growing worldwide, and Exovex is establishing a foothold in many emerging aesthetic markets. We are currently seeking distributors to fill the demand in several countries in Latin America, Europe, and Asia. If you know of any medical distributors who might be interested in exploring our open opportunities, you can share this link to set up an intro meeting with our international team.

How Exosomes Improve Hair Growth

Hair loss and thinning hair can significantly impact one's self-esteem and quality of life. While various treatments have been available to address these concerns, exosomes are gaining attention for their amazing potential in promoting hair growth. By stimulating hair follicle activity, increasing growth factors, and reducing inflammation, Exovex exosomes offer new possibilities for individuals seeking to restore and enhance their hair.

Practice Spotlight

Dr. Parvaneh Rafaeloff is the owner and medical director of La Jolie Medi Spa, one of Southern California's premier aesthetics practices.

La Jolie is a family run business with locations in Studio City and West Hollywood. They pride themselves on offering medi spa services customized for the unique needs of each patient.

What types of procedures are you using Exovex Exosomes for?

"We use Exovex for a variety of treatments. Most frequently, we use the product pos-microneedling to speed up the healing process and enhance treatment results. We also do IV treatments for conditions like arthritis, chronic pain, or even post stroke. Finally, we have started using Exovex in lieu of PRP to treat hair loss."

What have your results been like?

"The results for hair treatments have been phenomenal. After just 3 months, we definitely notice an improvement in thickness. When we use Exovex after Morpheus treatment, there is less inflammation and redness, with better and faster treatment results. Sometimes patients may not be able to tell the

difference because they have no frame of reference, but our staff and providers definitely notice a huge difference."

"Additionally, in one case I treated my 98-year-old father who had a non-healing ulcer that was getting worse. Within 1 week of applying Exovex, the ulcer was almost completely healed!"

What role do you anticipate exosomes will have in regenerative aesthetics in the future?

"Personally, I cannot wait for FDA approval for IV treatments. I'm optimistic that exosomes may be used in the future as a viable treatment for conditions like depression, dementia, neurological damage, fibromyalgia, TBI, and lupus."

You can see the amazing results on her website.
